UMWA Health & Retirement Funds Generics First Specialty Preferred Product Program Drug List

The Funds has a Generics First Specialty Preferred Product Program in eight specialty drug classes. These classes are Cardiac Disorders, Cystic Fibrosis, Hepatitis C, Oncology, Pulmonary Arterial Hypertension (PAH), Seizure Disorders, Movement Disorders, and Multiple Sclerosis. The preferred generic drugs in these classes are available to the beneficiary at the standard copay. If a non-preferred brand drug within these classes is selected, the prescriber will be asked to consider a preferred generic drug to be used before the non-preferred brand drug will be covered. Additional classes may be added in the future. If you have questions, please call CVS Caremark® Customer Care at 1-800-294-4741. The current Generics First Specialty Preferred Product Program Drug List is as follows:

Drug Class	Preferred Generic (standard copay)	Non-Preferred Brand *
Cardiac Disorders	generic dofetilide	Tikosyn (dofetilide)
Cystic Fibrosis	generic tobramycin inhalation solution	Tobi (tobramycin inhalation solution)
Hepatitis C	generic ribavirin generic ribavirin	Moderiba (ribavirin) Ribapak (ribavirin)
